The net profit for the group demonstrated an impressive growth and reached US\$29.4 million compared to US\$5.3 million in the second quarter of 2005.

Growth across all business segments was primarily organic, led by strong performances in the dairy and baby food segments. We expect this growth trend to continue in the second half of 2006. Sales in the Dairy Segment increased 24.8% from US\$247.5 million in the second quarter of 2005 to US\$308.9 million in the second quarter of 2006. The organic growth amounted to US\$53.0 million, while the new acquisitions contributed US\$8.4 million to the overall sales growth in the Segment. Topline growth was driven by a healthy balance of volume, price and favorable mix. The average dollar selling price rose 14.6% from US\$0.81 per kg in the second quarter of 2005 to US\$0.92 per kg in the second quarter of 2006. This increase was driven by 11.3% average ruble price growth. Foreign currency translation effect was 3.4% and did not impact significantly on the average dollar selling price in the Segment. The gross margin in the Dairy Segment increased to 31.3% from 25.6% due to the rise in average selling price outstripping the rise in raw milk prices that grew 9.0% y-o-y in dollar terms.

Sales in the Beverages Segment increased 4.1% from US\$86.7 million in the second quarter of 2005 to US\$90.2 million in the second quarter of 2006. This was driven mainly by currency exchange rate. The average selling price increased 1.2% from US\$0.70 per liter in the second quarter of 2005 to US\$0.71 per liter in the same period of 2006. This increase was due to both currency exchange rate growth, and ruble price increase offsetting the negative mix impact of lower revenue Lovely Garden. The gross margin in the Beverages Segment declined to 33.7% from 36.6%, driven mainly by higher concentrate and sugar prices.

Sales in the Baby Food Segment increased 32.4% to US\$28.8 million in the second quarter of 2006 from US\$21.8 million in the second quarter of 2005. This was driven primarily by volume growth and an increase in selling prices. The average selling price rose 17.1% from US\$1.51 per kg in the second quarter of 2005 to US\$1.76 per kg in the second quarter of 2006. The gross margin in the Baby Food Segment increased to 45.5% from 40.6%.

Selling and distribution expenses in the second quarter of 2006 decreased as a percentage of sales from 15.1% to 13.9% y-o-y, general and administrative expenses increased slightly as a percentage of sales from 7.4% to 7.7% for the same period. The operating margin rose significantly from 6.0% to 10.6%.

Financial expenses during the second quarter of 2006 decreased 43.8% to US\$3.6 million compared to US\$6.4 million in the same period of 2005. This was mainly the result of foreign currency translation gain amounting to US\$2.3 million in the second quarter of 2006, compared to US\$0.2 million charge in the second quarter of 2005.

Income tax expenses totalled US\$11.4 million compared to US\$8.9 million in the second quarter of 2005. At the same time, the effective tax rate declined from 59.6% to 27.2%. This sharp decline was driven by decrease in the group's taxable losses accompanied by an increase in taxable profits in the second quarter of 2006 versus the same period of 2005.

Net income increased more than five-fold to US\$29.4 million in the second quarter of 2006 compared to US\$5.3 million in the second quarter in 2005.

***Reconciliation of Adjusted EBITDA and Adjusted EBITDA margin to US GAAP Net Income**

Adjusted EBITDA is a non-U.S. GAAP financial measure. The following table presents reconciliation of Adjusted EBITDA to net income (and Adjusted EBITDA margin to net income as a percentage of sales), the most directly comparable U.S. GAAP financial measure.

	<u>6 months ended</u>		<u>6 months ended</u>	
	<u>June 30, 2006</u>		<u>June 30, 2005</u>	
	US\$ 'mln	% of sales	US\$ 'mln	% of sales
Net income	46.7	5.7%	8.3	1.2%
Add: Depreciation and amortization.....	29.8	3.7%	25.9	3.8%
Add: Income tax expense.....	21.1	2.6%	10.9	1.6%
Add: Interest expense.....	14.2	1.7%	11.4	1.7%

Adjusted EBITDA.....	104.9	12.9%	56.6	8.3%

Adjusted EBITDA represents net income before interest, income taxes and depreciation and amortization, adjusted for interest income, currency remeasurement gains, bank charges and other financial expenses and minority interest. Adjusted EBITDA margin is Adjusted EBITDA expressed as a percentage of sales.

We present Adjusted EBITDA because we consider it an important supplemental measure of our operating performance. In particular, we believe Adjusted EBITDA provides useful information to securities analysts, investors and other interested parties because it is used in the "debt to EBITDA" debt incurrence financial measurement in certain of our financing arrangements.

Adjusted EBITDA has limitations as an analytical tool, and you should not consider it in isolation, or as substitute for analysis of our operating results as reported under U.S. GAAP. Since we adjust EBITDA for recurring items in order to calculate Adjusted EBITDA, we particularly caution users that Adjusted EBITDA is not an alternative to net income, operating income or any other GAAP measure, nor to EBITDA. Moreover, other companies in our industry may calculate Adjusted EBITDA differently or may use it for different purposes than we do, limiting its usefulness as a comparative measure.

Adjusted EBITDA also should not be considered as an alternative to cash flow from operating activities or as a measure of our liquidity. In particular, Adjusted EBITDA should not be considered as a measure of discretionary cash available to us to invest in the growth of our business.
